

Jonathan Bird Productions

Specializing in the Underwater World

www.jonathanbird.net

- Jonathan Bird -

Professional underwater cinematographer and photographer

- Over 15 years of experience in the industry.
- Expertise in all conditions, including cold water and technically challenging diving. No environment is too hostile, from the pool to the Arctic Ocean.
- Formally educated as an electrical and ocean engineer, which allows for innovative solutions to keep costs down. Able to custom manufacture specialized gear to get the right shot.

Cinematography

- Award-winning cinematographer including two Emmy Awards and two Cine Golden Eagles.
- Experience in filming, directing and producing documentary films for broadcast and education. Jonathan has shot, directed and produced over 20 films that have aired in more than 20 countries.
- Client list includes National Geographic Television, USA Network, PBS, ABC, CNN, CBC Canada, Discovery Networks, the SciFi Channel and La Cinquieme.
- Complete surface and underwater high definition and standard definition packages including on site, real-time monitoring for advertising clients.
- No production is too complicated. Able to do everything from single camera shoots in a pool to elaborate, multi-camera specially lit underwater sets in the ocean. Can arrange for specialized production packages such as CineAlta and 35 mm film.
- Video editing available in Final Cut Pro, Avid and Media 100.
- Experience in working within a budget.
- Extensive stock video library available.

Photography

- Articles and images published in dozens of magazines worldwide including: *National Geographic*, *National Geographic World*, *National Geographic Kids*, *National Geographic Adventure*, *International Wildlife*, *Caribbean Travel and Life*, *Ranger Rick*, *Unterwasser*, *Sport Diver* and *Alert Diver*.
- Author of six books of underwater photography.
- Underwater production stills for your project as film or digital images.
- Stock photography archive with over 15,000 images of marine animals, reefs, wrecks, scuba divers and diving destinations. Extensive catalog of sharks and marine mammals.
